---

**Backflow Prevention Program Regulations:** Cross-connection control and backflow protection for public water systems may require the installation of a double check valve assembly, reduced pressure backflow prevention assembly, or other devices or methods approved by West Virginia law. **A device may be required or is already present on your Domestic Service, Fire Service, and/or Irrigation System if applicable.** Initial and Annual Testing of the device(s) is a state mandated requirement. Testing and maintenance of the device(s) is a Customer / Owner responsibility.

**Grease Trap Systems:** The installation and maintenance of a grease trap system reduces the amount of fats, oil, and grease in the public sewer system. This keeps maintenance costs and wastewater rates down by reducing the costs involved with unplugging or replacing grease-blocked pipes, repairing pump stations, and cleaning up costly illicit discharges. **A grease trap system may be required or is already present on your Sanitary Sewer Service.** It is a Customer / Owner responsibility to install and maintain an approved grease trap system.

The undersigned hereby applies for Commercial Water Service on \_\_\_\_\_, 20\_\_\_\_. It is agreed that MUB shall not be responsible for damage to persons or property caused by failure or defects of pipes, high or low pressure, by escape or leakage due to conditions on said premises existing at or after turning service on, and applicant will hold MUB harmless there from. The undersigned also agrees to comply with MUB's rules and regulations.

**INCOMPLETE APPLICATION OR PAPERWORK WILL RESULT IN WATER SERVICE TERMINATION**

Signature of Authorized Company Representative \_\_\_\_\_
